

Studia Quaternaria vol. 31 no. 1

Quaternary palaeoecology

Editorial	3
<i>Magdalena Filoc, Mirosława Kupryjanowicz, Danuta Drzymulska</i> Late Glacial and Holocene vegetation changes in the Wigry National Park, NE Poland – new pollen data from three small dystrophic lakes	5
<i>Anna Hrynowiecka, Marcin Żarski, Hanna Winter</i> Vegetation and stratigraphy of the Mazovian (Holsteinian) Interglacial sections from Dobropol and other new sites in western Polesie region, south-eastern Poland	17
<i>Monika Niska, Małgorzata Roman</i> Development of the Kubłowo palaeolake, central Poland, during the Eemian Interglacial as against subfossil Cladocera analysis – preliminary results	31
<i>Iwona Okuniewska-Nowaczyk, Iwona Sobkowiak-Tabaka</i> Palynology and archaeology of Late Vistulian and Early Holocene sites in Lubuskie Lake District, western Poland	39
<i>Marta Szal, Mirosława Kupryjanowicz, Mariusz Wyczółkowski</i> Late Holocene changes in vegetation of the Mrągowo Lakeland (NE Poland) as registered in the pollen record from Lake Sałęt	51
<i>Samuli Helama, Jari Holopainen, Mauri Timonen, Kari Mielikäinen</i> An 854-year tree-ring chronology of scots pine for south-west Finland.	61

Studia Quaternaria vol. 31 no. 2

Application of geophysical methods to interdisciplinary research of near-surface geological medium

Editorial	71
<i>Radosław Mieszkowski, Jan Dzierżek, Dominik Stańczuk</i> Application of geoelectrical profiling in the delineation of shallow periglacial structures on the Drohiczyn Plateau	73
<i>Maciej Maślakowski, Sebastian Kowalczyk, Radosław Mieszkowski, Kazimierz Józefiak</i> Using Electrical Resistivity Tomography (ERT) as a tool in geotechnical investigation of the substrate of a highway	83
<i>Grzegorz Pacanowski, Paweł Czarniak, Anna Bąkowska, Radosław Mieszkowski, Fabian Welc</i> The role of geophysical ERT method to evaluate the leakproofness of diaphragm wall of deep foundation trenches on the example of the construction of retail and office complex in Lublin, Poland	91
<i>Łukasz Kaczmarek, Radosław Mieszkowski, Marcin Kołpaczyński, Grzegorz Pacanowski</i> Application of Electrical Resistivity Tomography (ERT) in the investigation of Quaternary landslide zones, based on the selected regions of Płock slope	101
<i>Michał Glazer, Maciej Jan Mendecki, Mateusz Mycka</i> Application of DOI index to analysis of selected examples of resistivity imaging models in Quaternary sediments	109
<i>Maciej Jan Mendecki, Michał Glazer, Mateusz Mycka</i> Application of passive seismic to shallow geological structures in urban areas	115
<i>Radosław Mieszkowski, Fabian Welc, Janusz Budziszewski, Witold Migal, Anna Bąkowska</i> Preliminary results of the ground penetrating radar (GPR) prospection in the area of the prehistoric flint mine Borownia, southeastern Poland	123
<i>Fabian Welc, Radosław Mieszkowski, Sebastian Kowalczyk, Jerzy Trzciniński</i> Applicability of ground penetrating radar on desert archaeological sites: a case study from the Saqqara necropolis in Egypt.	133
