

Studia Quaternaria vol. 39 no. 1

State and pollution of the environment in north-eastern Poland, selected issues

Guest Editor: Elżbieta Skorbiłowicz

Editorial	3
<i>Marzena Ewa Smolewska, Małgorzata Krasowska, Jolanta Piekut, Maciej Smolewski, Ewelina Bagińska</i>	
Assessment of PAH content in soil and aboveground parts of <i>Lolium perenne</i> L. next to the communication arteries of the urban agglomeration	5
<i>Dariusz Boruszko, Ada Wojciula</i>	
Heavy metals and polycyclic aromatic hydrocarbons in leachates from autothermal thermophilic aerobic digestion as a potential threat to the environment in north-eastern Poland	15
<i>Piotr Ofman</i>	
Identification of pollution sources in the Narew River catchment using multivariate statistical methods	23
<i>Aleksander Kiryluk</i>	
Plant communities in drainage ditches – conditions, characteristics and environmental functions	31
<i>Małgorzata Krasowska, Małgorzata Kowczyk-Sadowy</i>	
Assessment of the possibility of using waste from agri-food processing for fertilization purposes	41

Studia Quaternaria vol. 39 no. 2

<i>William C. Mahaney, Ronald G.V. Hancock</i>	
Origin, weathering and paleoclimatic significance of Middle–Late Pleistocene slope covers, Mt. Kenya, Kenya	51
<i>Abdelrhim Eltijani, Dávid Molnár, László Makó, János Geiger, Pál Sümegi</i>	
Applying grain-size and compositional data analysis for interpretation of the Quaternary oxbow lake sedimentation processes: Eastern Great Hungarian Plain	83
<i>Jean-Marc Deom, Renato Sala</i>	
The arid regions of Daryalyk Takyr and Telikol: ethno-geoarchaeological study of a strategic transhumance rangeland on the right bank of the Syr Darya delta, Kazakhstan	95
<i>Nour Nayef Hassan Alzoubi, Janos Geiger, Sandor Gulyas</i>	
Defining rock-forming components of Holocene freshwater carbonates via univariate statistical and mixture analysis of computer tomography data	113
